

## New tado° V3+ Smart Thermostats for a healthy climate at home

**V3+ products come with a newly-designed app and an Air Comfort Skill for more simplicity, comfort, and wellbeing.**

**Berlin, 31 August 2018** - tado°, the leader in home climate management, launches its new V3+ product generation at IFA Berlin today. With the heating season about to start, the tado° Smart Thermostats now let you interact with your home more intuitively than ever before.

### **Air Comfort**

The new Air Comfort Skill helps you to achieve healthier indoor air, improved productivity, and a better quality of sleep for more wellbeing at home. This Skill guides you to a healthier home environment by giving insights into your home's air climate and providing you with concrete, meaningful, and actionable advice on how to achieve more comfort, while offering tips on preventing health risks such as mold.

tado° will provide advice such as when and for how long to open the windows or how to reduce humidity. Recommendations on when to air certain rooms are based on both the air freshness inside as well as on the outside air quality in your neighbourhood, presence of people, and local weather forecasts. For example, if pollution is heightened during rush hour or pollen is particularly high in your area, tado° will guide you on how best to manage it and when to open your windows.

### **New App**

The Air Comfort Skill is part of a brand-new app for the V3+ product suite. It joins a variety of other core Skills which assist users in their daily life, such as Geofencing, Weather Adaptation, Open Window Detection, Smart Schedules, and Insightful Reports. The app is designed so that customers can tailor it by activating the Skills they would like to use.

tado° users who wish more assistance in managing their climate at home can use the app to purchase boiler repair services, to schedule an annual maintenance, to get a quote on a new boiler, or to subscribe to the Auto-Assist Skill which further automates your smart home for £2.99 per month or for £24.99 annually.

**Simplicity, Comfort and Wellbeing**

“We are proud to launch our new V3+ product suite which is another step forward to help our customers to save energy, while at the same time enjoying a comfortable and healthy home.” says tado° Co-Founder & CPO Christian Deilmann. “Everyone is unique, which is why we’ve also added a new level of customisation in our app that is intuitive for all to use, and serves as your personal climate assistant.”

**V3+ Starter Kit Lineup and Add-Ons**

The V3+ Smart Thermostat Starter Kit retails for £199.99, while the Smart Radiator Thermostat Starter Kit now comes with one Smart Radiator Thermostat and is priced at £119.99. Further heating products are available in single or multi packs to enable individual room control. Saving up to 31% on your heating bill, tado° Smart Thermostats pay for themselves within the first year. tado° therefore provides a 12 month Energy Savings Guarantee, offering customers a full refund in their first year, no questions asked.

The V3+ product suite is available at Amazon and other major retailers as well as from tado.com. Fully compatible with Apple HomeKit, Amazon Alexa, and the Google Assistant, the V3+ suite seamlessly integrates into and enhances any smart home.
