

## tado° now live with the Google Assistant

**Munich, 16 August 2017:** As an official launch partner, tado° is delighted to announce that its integration with the Google Assistant is now live. The European market leader in intelligent home climate control brings the Assistant on Google Home to its product portfolio opening up tens of millions of homes to a new way of controlling their heating and air conditioning.

The partnership opens up a new realm of possibilities. tado° users will be able to integrate their Smart Thermostats and Smart AC Controls into the Google Assistant, as well as intuitively using hands-free voice control to regulate the temperature at home for more comfort, convenience and savings. The Assistant on Google Home allows users to set, increase or decrease their home temperature with tado°; for example: "Ok Google, set living room to 22 degrees", or "Ok Google, increase bedroom temperature by three degrees."

tado° is one of the first companies to bring the Google Assistant to its smart radiator thermostats for complete multi-room heating control of homes, as well as offering a seamless integration with its Smart Thermostat and Smart AC Control.

"We are thrilled to join the Google Assistant platform," announced tado° CEO, Toon Bouten. "Assimilating Google's technology to our portfolio helps us pioneer the development of voice control for a more comfortable and convenient home experience."

tado°'s relationship with Google follows its recent integrations with Apple HomeKit and Amazon Echo, giving the company's users many possibilities to use voice control with Siri, Alexa and now the Google Assistant. tado° is the independent vertical leader of intelligent home climate control, which allows it to partner with all of the major platforms for the best user experience.
